Education

Master of Computer Applications 08/2025 – Present
Department of Computer Science, University of Delhi

Bachelor of Science in Computer Science with minor in Statistics 11/2021 – 06/2024
Ram Lal Anand College, University of Delhi

Work Experience

Full Stack Developement Intern, [Ram Lal Anand College](#) 10/2023 – 04/2024

- **Designed and developed** 6 responsive web pages for Ram Lal Anand College's official website, **creating** a user-friendly and customizable interface for showcasing faculty profiles.
- **Improved** usability by **designing** an intuitive and visually appealing interface for faculty profile pages.
- Optimized the interface for **desktop, tablet, and mobile** devices.

Projects

[Logisick](#) 🔗 , *Track, manage and analyze your inventory with ease.* 08/2025 – 12/2025

Tech Stack: Reactjs, React Query, Node.js, Express.js, MongoDB, JWT, Tailwind CSS, Git

- **Developed** LogiSick, a smart web-based inventory and logistics management platform to streamline supply chain and warehouse operations.
- **Optimized** client-side data fetching and caching using React Query, improving application responsiveness and reducing unnecessary API requests.
- **Engineered** backend services and RESTful APIs with Node.js and Express.js to manage inventory, orders, and deliveries.
- **Designed** MongoDB schemas for efficient storage and management of product data, stock levels, orders, and user activity logs.
- **Integrated** JWT-based authentication and **implemented** role-based access control (Admin, Manager, Staff) to enforce secure access and authorization.
- **Built** a comprehensive product management API with 25+ end points supporting CRUD operations, product categorization, tagging, and QR code generation and more.
- **Implemented** advanced search and filtering capabilities, enabling rapid product lookup by SKU, barcode, category, supplier, quantity, and expiry date.

[MedBudget](#) 🔗 , *A web platform for planning monthly medicine requirements, tracking medication expenses, and managing refill reminders.* 06/2026 – 07/2026

Tech Stack: Nextjs, supabase, Tailwind CSS, Git

- **Developed** MedBudget, a full-stack web application that helps users plan monthly medicine requirements, manage medication expenses.
- **Designed** a PostgreSQL database with Supabase for efficient storage of monthly schedules, and user information.
- **Implemented** Supabase Authentication and Row-Level Security (RLS) to provide secure, user-specific access to application data.
- **Automated** monthly email reminders using Supabase Cron Jobs to notify users when it's time to purchase medicines for the upcoming month.
- **Developed** dynamic cost calculation features to estimate monthly medicine expenses based on dosage, frequency.
- **Leveraged** Next.js Server Components and server-side rendering to improve application performance and deliver a fast, responsive user experience.

Technical Skills

- **Programming Languages:** C/C++, python, javascript, SQL
- **Frontend:** [React.js](#), [Next.js](#) 🔗 , HTML5, [CSS3](#) 🔗 , Tailwind CSS
- **Operating Systems:** Linux, Windows
- **Backend:** [Node.js](#), [Express.js](#), [REST APIs](#) 🔗
- **Database & ORM:** MongoDB, PostgreSQL, MySQL, Prisma
- **Authentication & Backend Services:** JWT, Supabase (Auth, RLS)
- **Tools & Technologies:** Git, Github, Docker
